animas

We know what's on your mind.

System Requirements:

- Mac II, IIx, IIcx, IIfx, IIfx, IIfx, LC, & SE 30 with a color monitor (with at least 2 megabytes of RAM)
- 32-Bit Quickdraw

Animas is proud to present its True-Color Hand Scanner bundled with ColorScan MacCheese as the definitive answer to your *desktop publishing* and *multimedia problems*. ColorScan MacCheese itself is a *versatile paint program*. You can paint in different shapes, modify objects, edit colors, even edit the palette. And inside ColorScan MacCheese we have also written *specialized features* such as: the "Blur" effect, which *softens* the focus of an image; and the "Sharpen" effect, which improves the *clarity* of an image. We truly are capturing the universe in 24-bit color!

ColorScan MacCheese also provides you with great *flexibility* and *compatibility*. After an image is scanned you have the capability to edit the image directly in the software or transfer the image to other programs; such as, PageMaker 4.0, Quark

XPress, Adobe Photoshop, and many others. ColorScan MacCheese will also enhance your use of *multimedia presentation* applications like:

Supercard, Hypercard 2.0, and a multitude of others.

The combination of the Animas Color Hand Scanner with ColorScan MacCheese provides the *total solution* to all your *desktop publishing* and *multimedia presentations*.

▲ Image scanned directly into ColorScan MacCheese.

▲ Image created with ColorScan MacCheese.

▲ Images edited with ColorScan MacCheese.

* ColorScan MacCheese is a software that combines freehand drawing and scanned-in photographs with paint and image enhancement tools to create vivid and colorful images.

The Animas True-Color Hand Scanner's linear tracking system gives smooth scans for those with the shakiest of hands. The scanner attaches to a SCSI device which translates the image into a crisp 24-bit color image.
